

Hell i think that sence i have to pay for XM. i should be able to lisen to what is important to me. and to have the loco weather to lission to. sence fm and am get distorted so mutch that i cant here if there are warnings out or not. at least with XM i get a clear and undistorted reseption. and it is veary up to date. besides think of XM as a cabel or satelite network for the radio. if i want to pay for music let me lisson to what i want to lisson to. would you like it if i told you you could never take a crap or a leek. that is exactley what is going on here, doint tell me i can never lisen to weather or any thing on xm, because im paying for it. that is rong and any one knows it. so leet XM be, let them do there wone thing, ok.

Thank you for reading this leter.

Jesse
